10 Day Distance Healing

This is a set 10 chakra healing sessions offered via distance over 10 days. It is does not require the client to be physically present. It serves as an emotional support system during stressful times.

What is distance healing? How does it work?

Reiki gives us techniques that help us to transmit positive energy and healing to someone who is not physically present with us at the time. It works in the same way that prayers work.

We don't realize it but we are always energetically connected with people with whom we have an emotional bond. E.g. sometimes, we already know what the other person is thinking before they tell us or we know that something will happen before it happens or we are thinking about someone and they call us. All these experiences take place due to spontaneous connection of energy body. Reiki gives us techniques to connect to another person's energy and send energy to them in a methodical way.

Who should sign up for distance healing?

Those who are unable to go for touch healing because of time/ distance/ health constraints can sign up for distance healing. It is also possible to ask for distance healing for a loved one who is going through a tough time. Clients can go about their routine and do NOT have to do anything special to receive healing. We just need a photo, name, age and location to do distance healing.

Typical Cases

- Patients undergoing medical treatment; Energy helps them to feel positive and heal faster
- People who are going through stress
- Teenagers

Most people feel a difference within 3-4 days.

Results of distance healing

Every case and every result is unique and we cannot generalize or give any guarantee of the result.

Typical Results

- Person becomes calmer
- Person becomes more open to others
- Relationships improve
- Kids become more receptive to parents
- Patient responds better to medical treatment
